Data, Units of Study (Subject Fields), Vocational
Education
IDENTIFIERS *Nevada

ABSTRACT

The survey of adult education in Nevada contains data on comparative enrollments, 1963-70, for the state, counties, and participating institutions; enrollment by school districts; and a statewide summary of public school continuing education programs in 1970. The comparative enrollment and statewide summary data are further divided into enrollment by occupational education: agricultural, business and office, distributive, health, home economics, technical, post secondary, and trade and industrial; and by general adult education: adult basic education, adult general high school education, community programs, and civil defense adult education. The larger part of the document is devoted to county enrollment summary data including course titles, instructors, number enrolled per course, and hours of instruction. (PT)

FOREWORD

The Adult Education Survey has been a continuous service provided by the State Education Department, Vocational-Technical and Adult Education Branch since 1954. The survey has been entirely dependent upon the cooperation of all Nevada School Districts, the University of Nevada and other educational agencies involved in adult education. To this end, I express my sincere appreciation to each school district and the University of Nevada, Reno and Las Vegas, and the Elko Community College, for making this Adult Survey possible.

John W. Bunten
Director
Vocational-Technical &
Adult Education Branch
